

1) JP8-117083

2) Filed: Apr.15,1996

3) Inventors: Hitoshi Kawai, Jun Kawakami, Kouichi Tsukihara

4) Comment:

Reduction of crosstalk caused by light leakage at polarization beam splitter.

1:light source for index measurement

2:SHG element ($\omega_2 \rightarrow \omega_3$)

4:polarization beam splitter

5:reference path

6:signal path

12: light source to mesure stage moving
(like He-Ne laser)

17,18: phase meter

19:calculator

20 to 11: for reference path index measurement
(refer to Fig.2)

20 to 10: for signl path index measurement

9: SHG element
10: polarization beam splitter
22:It acts like λ plate for ω_3 , but also acts like $\lambda/2$ plate for ω_2
